## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-16 are allowed.

### ***Reasons For Allowance***

The following is an examiner's statement of reasons for allowance:

Graf, US Patent no. 6,317,798 discloses initiation of a BIOS console redirection in a computer system.

Murphy, US Patent Application Publication no. 2004/0177245 discloses predicting whether a first resource configuration will be more efficient than a second resource configuration.

Magro et al., US Patent no. 6,546,482, discloses detecting conflicts between system resources of a microcontroller.

Mahmoud, US Patent no. 6,865,669, discloses allocating memory for BIOS components in a computer system.

The prior art of record does not teach or suggest determining that an operating system has allocated resources in a manner that indicates a conflict between a BIOS redirection component and the operating system may occur and preemptively releasing resources allocated to the BIOS redirection component to prevent the possible conflict.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
